## Caldecott Connections to Science Shan Glandon

Take advantage of the appeal and power of Caldecott award literature to extend and promote learning across the curriculum. In these three volumes the author demonstrates how to use award-winning books as springboards to science, social studies learning, and language arts in the library and classroom-and to expand student awareness and appreciation of illustration techniques. For each Caldecott title there is background information on the illustrations, curriculum connections, lesson plans, and support materials for teaching. Glandon also integrates Gardner's multiple intelligences with curriculum content. With a flexible, discovery approach, these activity units focus on student-centered, experiential, holistic, and authentic learning and they are ready for instant implementation. Targeted to primary grade objectives and abilities, the books include an array of individual projects and collaborative ones. They also foster collaborations between library media specialists and classroom teachers.
