CRC Handbook of Engineering in Agriculture, Volume II

Robert H. Brown

CRC Handbook of Engineering in Agriculture, Volume II Robert H. Brown

These three volumes present essential engineering technologies most often used for design and evaluation of the best practices in agricultural production and postharvest processing operations. The choices, requirements, procedures, and expected performances are expertly supported with equations, data tables, illustrations, charts, graphs, and data conversion factors for SI units. Written by highly qualified and experienced agricultural engineers, the chapters emphasize field machines and practices, irrigation engineering, drainage and erosion control, and waste management. Also included is information on electrical systems and electric motors, design of structures, ventilation and lighting systems, and livestock and poultry production. This volume is especially written for engineers of all types, agricultural scientists, extension specialists, ag-industry-managers, and engineering students.
