## **Essential PHP fast** Simon Stobart

How to create dynamic web environments using the PHP language and the MySQL database!

If you are familiar with the syntax for C, C++ and Java, then PHP will seem very familiar. Once you have got up to speed with this HTML embedded scripting language, you will soon be creating dynamic HTML database-enabled web pages quickly and easily.

This quick and practical introduction explains:

- how PHP works and what a dynamic web page is;
- the software development environment;
- the syntax and features of the language;
- how PHP can be integrated with MySQL databases;
- dynamic database applications.

Clearly written, this book provides you with all the essential information you need to create your own dynamic web environments using PHP.
