Partial Differential Equations and Boundary-value Problems With Applications (Pure and Applied Undergraduate Texts)

Mark A. Pinsky

Partial Differential Equations and Boundary-value Problems With Applications (Pure and Applied Undergraduate Texts) Mark A. Pinsky

Building on the basic techniques of separation of variables and Fourier series, the book presents the solution of boundary-value problems for basic partial differential equations: the heat equation, wave equation, and Laplace equation, considered in various standard coordinate systems--rectangular, cylindrical, and spherical. Each of the equations is derived in the three-dimensional context; the solutions are organized according to the geometry of the coordinate system, which makes the mathematics especially transparent. Bessel and Legendre functions are studied and used whenever appropriate throughout the text. The notions of steady-state solution of closely related stationary solutions are developed for the heat equation; applications to the study of heat flow in the earth are presented. The problem of the vibrating string is studied in detail both in the Fourier transform setting and from the viewpoint of the explicit representation (d'Alembert formula). Additional chapters include the numerical analysis of solutions and the method of Green's functions for solutions of partial differential equations. The exposition also includes asymptotic methods (Laplace transform and stationary phase). With more than 200 working examples and 700 exercises (more than 450 with answers), the book is suitable for an undergraduate course in partial differential equations.

From reader reviews:

Jaleesa Greenwood:

Book is written, printed, or illustrated for everything. You can realize everything you want by a publication. Book has a different type. To be sure that book is important issue to bring us around the world. Close to that you can your reading proficiency was fluently. A guide Partial Differential Equations and Boundary-value Problems With Applications (Pure and Applied Undergraduate Texts) will make you to always be smarter. You can feel considerably more confidence if you can know about every thing. But some of you think that will open or reading a book make you bored. It's not make you fun. Why they might be thought like that? Have you looking for best book or acceptable book with you?

Timothy Patrick:

What do you concerning book? It is not important to you? Or just adding material when you require something to explain what your own problem? How about your time? Or are you busy person? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have time? What did you do? Everybody has many questions above. They have to answer that question because just their can do in which. It said that about book. Book is familiar on every person. Yes, it is proper. Because start from on kindergarten until university need that Partial Differential Equations and Boundary-value Problems With Applications (Pure and Applied Undergraduate Texts) to read.

Doris Rice:

Now a day those who Living in the era exactly where everything reachable by connect to the internet and the resources inside it can be true or not need people to be aware of each facts they get. How individuals to be smart in acquiring any information nowadays? Of course the answer then is reading a book. Examining a book can help individuals out of this uncertainty Information mainly this Partial Differential Equations and Boundary-value Problems With Applications (Pure and Applied Undergraduate Texts) book because book offers you rich data and knowledge. Of course the details in this book hundred % guarantees there is no doubt in it you may already know.

Catherine Rubio:

Don't be worry if you are afraid that this book will certainly filled the space in your house, you can have it in e-book method, more simple and reachable. This kind of Partial Differential Equations and Boundary-value Problems With Applications (Pure and Applied Undergraduate Texts) can give you a lot of buddies because by you looking at this one book you have issue that they don't and make anyone more like an interesting person. This particular book can be one of a step for you to get success. This book offer you information that perhaps your friend doesn't know, by knowing more than additional make you to be great persons. So , why hesitate? We should have Partial Differential Equations and Boundary-value Problems With Applications (Pure and Applied Undergraduate Texts).
