Statistical Diagnostics for Cancer: Analyzing High-Dimensional Data (Quantitative and Network Biology (VCH))

Statistical Diagnostics for Cancer: Analyzing High-Dimensional Data (Quantitative and Network Biology (VCH))

Statistical Diagnostics for Cancer: Analyzing High-Dimensional Data (Quantitative and Network Biology (VCH))

This ready reference discusses different methods for statistically analyzing and validating data created with high-throughput methods. As opposed to other titles, this book focusses on systems approaches, meaning that no single gene or protein forms the basis of the analysis but rather a more or less complex biological network. From a methodological point of view, the well balanced contributions describe a variety of modern supervised and unsupervised statistical methods applied to various large-scale datasets from genomics and genetics experiments. Furthermore, since the availability of sufficient computer power in recent years has shifted attention from parametric to nonparametric methods, the methods presented here make use of such computer-intensive approaches as Bootstrap, Markov Chain Monte Carlo or general resampling methods. Finally, due to the large amount of information available in public databases, a chapter on Bayesian methods is included, which also provides a systematic means to integrate this information. A welcome guide for mathematicians and the medical and basic research communities.

From reader reviews:

Leopoldo Gonzalez:

Now a day people that Living in the era exactly where everything reachable by connect to the internet and the resources included can be true or not demand people to be aware of each facts they get. How a lot more to be smart in receiving any information nowadays? Of course the answer then is reading a book. Studying a book can help persons out of this uncertainty Information particularly this Statistical Diagnostics for Cancer: Analyzing High-Dimensional Data (Quantitative and Network Biology (VCH)) book because this book offers you rich data and knowledge. Of course the data in this book hundred % guarantees there is no doubt in it as you know.

Christina Fitts:

Spent a free time for you to be fun activity to complete! A lot of people spent their spare time with their family, or their own friends. Usually they performing activity like watching television, planning to beach, or picnic within the park. They actually doing ditto every week. Do you feel it? Do you need to something different to fill your own free time/ holiday? Can be reading a book is usually option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of publication that you should read. If you want to try out look for book, may be the book untitled Statistical Diagnostics for Cancer: Analyzing High-Dimensional Data (Quantitative and Network Biology (VCH)) can be good book to read. May be it is usually best activity to you.

Sandra Passmore:

Is it you who having spare time in that case spend it whole day through watching television programs or just resting on the bed? Do you need something new? This Statistical Diagnostics for Cancer: Analyzing High-Dimensional Data (Quantitative and Network Biology (VCH)) can be the answer, oh how comes? It's a book you know. You are consequently out of date, spending your free time by reading in this new era is common not a nerd activity. So what these guides have than the others?

Robert Harriman:

In this particular era which is the greater person or who has ability in doing something more are more valuable than other. Do you want to become certainly one of it? It is just simple method to have that. What you should do is just spending your time not much but quite enough to possess a look at some books. One of the books in the top record in your reading list is usually Statistical Diagnostics for Cancer: Analyzing High-Dimensional Data (Quantitative and Network Biology (VCH)). This book and that is qualified as The Hungry Slopes can get you closer in growing to be precious person. By looking upwards and review this reserve you can get many advantages.
