Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) Luis Barreira, Claudia Valls

This text provides an accessible, self-contained and rigorous introduction to complex analysis and differential equations. Topics covered include holomorphic functions, Fourier series, ordinary and partial differential equations.

The text is divided into two parts: part one focuses on complex analysis and part two on differential equations. Each part can be read independently, so in essence this text offers two books in one. In the second part of the book, some emphasis is given to the application of complex analysis to differential equations. Half of the book consists of approximately 200 worked out problems, carefully prepared for each part of theory, plus 200 exercises of variable levels of difficulty.

Tailored to any course giving the first introduction to complex analysis or differential equations, this text assumes only a basic knowledge of linear algebra and differential and integral calculus. Moreover, the large number of examples, worked out problems and exercises makes this the ideal book for independent study.

From reader reviews:

Mildred Parker:

The actual book Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) will bring that you the new experience of reading some sort of book. The author style to explain the idea is very unique. In case you try to find new book to read, this book very appropriate to you. The book Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) is much recommended to you to see. You can also get the e-book from official web site, so you can more easily to read the book.

Rodney Wilson:

Reading a book to become new life style in this season; every people loves to go through a book. When you read a book you can get a wide range of benefit. When you read ebooks, you can improve your knowledge, due to the fact book has a lot of information in it. The information that you will get depend on what forms of book that you have read. If you need to get information about your examine, you can read education books, but if you want to entertain yourself you can read a fiction books, this kind of us novel, comics, as well as soon. The Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) will give you new experience in studying a book.

Lorraine Cox:

Is it an individual who having spare time subsequently spend it whole day through watching television programs or just lying on the bed? Do you need something new? This Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) can be the answer, oh how comes? A fresh book you know. You are thus out of date, spending your free time by reading in this completely new era is common not a nerd activity. So what these publications have than the others?

Rhonda Lanham:

Don't be worry in case you are afraid that this book will certainly filled the space in your house, you may have it in e-book method, more simple and reachable. This kind of Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) can give you a lot of good friends because by you checking out this one book you have thing that they don't and make you more like an interesting person. This book can be one of a step for you to get success. This reserve offer you information that might be your friend doesn't know, by knowing more than additional make you to be great people. So , why hesitate? Let us have Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series).
