Gem Water: How to Prepare and Use Over 130 Crystal Waters for Therapeutic Treatments Joachim Goebel, Michael Gienger

Effective and healthy remedies produced by infusing water with appealing crystalline energies are carefully described in this informative manual. The first part covers aspects of preparation, featuring deceptively simple processes such as the boiling method, the water vapor method, and the test tube method—all of which can be easily mastered by crystal healing enthusiasts. After outlining the correct methods to use and listing poisonous crystals as a safety precaution, the book examines more than 100 usable crystals and 34 special mixtures, revealing their intended uses and effects for the optimum in therapeutic results.
