Handbook of Cellular Manufacturing Systems

Handbook of Cellular Manufacturing Systems

A hands-on guide to implementing multi-cell manufacturing systems on a large scale.

Cellular manufacturing (CM) is the grouping of similar products for manufacture in discrete multi-machine cells. It has been proven to yield faster production cycles, lower in-process inventory levels, and enhanced product quality.

Pioneered on a large scale by Russian, British, and German manufacturers, interest in CM methods has grown steadily over the past decade. However, there continues to be a dearth of practical guides for industrial engineers and production managers interested in implementing CM techniques in their plants. Bringing together contributions by an international team of CM experts, the Handbook of Cellular Manufacturing Systems bridges this gap in the engineering literature. With the help of numerous in-depth case studies drawn from a wide range of industries, the Handbook covers:

- * History and basic principles of cellular manufacturing.
- * Methods for cell formation, layout, and scheduling of large manufacturing systems.
- * Setup time reduction techniques.
- * Quality control in CM.
- * Benchmarking and performance evaluation of cells.
- * Financial costs and benefits of CM versus traditional approaches.
- * Human resources and team development issues in CM.
- * Computer-aided methods and tools for planning, designing, implementing, and managing cells in manufacturing plants.

The Handbook of Cellular Manufacturing Systems is an indispensable resource for industrial engineers and production managers interested in implementing this exciting new alternative to conventional manufacturing system configurations.

From reader reviews:

Ruth Haakenson:

Here thing why this kind of Handbook of Cellular Manufacturing Systems are different and trustworthy to be yours. First of all looking at a book is good nevertheless it depends in the content of the usb ports which is the content is as tasty as food or not. Handbook of Cellular Manufacturing Systems giving you information deeper as different ways, you can find any publication out there but there is no book that similar with Handbook of Cellular Manufacturing Systems. It gives you thrill reading journey, its open up your own eyes about the thing this happened in the world which is perhaps can be happened around you. You can actually bring everywhere like in area, café, or even in your means home by train. For anyone who is having difficulties in bringing the paper book maybe the form of Handbook of Cellular Manufacturing Systems in e-book can be your alternative.

Stacey Williams:

Information is provisions for anyone to get better life, information currently can get by anyone with everywhere. The information can be a knowledge or any news even a problem. What people must be consider whenever those information which is from the former life are challenging be find than now could be taking seriously which one is acceptable to believe or which one the actual resource are convinced. If you obtain the unstable resource then you have it as your main information there will be huge disadvantage for you. All those possibilities will not happen within you if you take Handbook of Cellular Manufacturing Systems as the daily resource information.

Nancy Steffen:

Playing with family inside a park, coming to see the marine world or hanging out with good friends is thing that usually you could have done when you have spare time, then why you don't try thing that really opposite from that. A single activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition of knowledge. Even you love Handbook of Cellular Manufacturing Systems, you may enjoy both. It is fine combination right, you still need to miss it? What kind of hang type is it? Oh come on its mind hangout people. What? Still don't have it, oh come on its called reading friends.

Jon Fuselier:

As we know that book is important thing to add our expertise for everything. By a e-book we can know everything we really wish for. A book is a list of written, printed, illustrated or maybe blank sheet. Every year seemed to be exactly added. This publication Handbook of Cellular Manufacturing Systems was filled concerning science. Spend your extra time to add your knowledge about your research competence. Some people has several feel when they reading a new book. If you know how big benefit of a book, you can truly feel enjoy to read a reserve. In the modern era like now, many ways to get book that you wanted.
