Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering)

Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering)

Many factors are relevant in making the proper choice of food packaging material, including those related to shelf life and biodegradability. To meet these demands, new processing and preservation techniques have arisen, most notably modified atmosphere packaging (MAP) and active packaging (AP). **Modified Atmosphere and Active Packaging Technologies** presents an overview of the current status of MAP and AP, exploring techniques, methodologies, applications, and relevant legislation.

For clarity and easy reference, the book is divided into seven convenient sections:

- **Principles, Materials, Gases, and Machinery for MAP** provides a basic overview of the topic and defines modified atmosphere, controlled atmosphere, and active packaging.
- **Safety and Quality Control of MAP Products** examines the effect of MAP on various foods and discusses governmental control mechanisms to ensure food safety.
- **Applications of MAP in Foods of Animal Origin** explores how MAP can be used in fish, meat, poultry and dairy products.
- **Applications of MAP in Foods of Plant Origin** discusses MAP for cereals, minimally processed vegetables, fruits, and bakery products.
- **Other Applications of MAP** reviews MAP's use in ready-to-eat (RTE) foods and coffee, tea, beer, and snack foods.
- **Active Packaging and its New Trends** examines issues related to nanotechnology and bioactive packaging.
- **Consumer Behavior/Sensory Analysis and Legislation** covers legislation in the European Union, the United States, and Canada and presents conclusions and new issues on the horizon.

From the very basics (films, gases, techniques, and applications) up to the latest advances (nanotechnology and bioactive compounds), this book covers nearly all issues related to MAP and AP, providing an essential reference for food scientists and engineers, agriculturalists, chemists, and all those on the cutting edge of food packaging.

From reader reviews:

Sylvia Dasilva:

The event that you get from Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering) is a more deep you looking the information that hide inside words the more you get interested in reading it. It doesn't mean that this book is hard to understand but Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering) giving you joy feeling of reading. The copy writer conveys their point in specific way that can be understood by simply anyone who read the idea because the author of this e-book is well-known enough. This book also makes your own vocabulary increase well. Therefore it is easy to understand then can go with you, both in printed or e-book style are available. We suggest you for having that Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering) instantly.

Thomas Ellis:

Hey guys, do you desires to finds a new book to study? May be the book with the concept Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering) suitable to you? Often the book was written by well known writer in this era. The book untitled Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering)is the main one of several books in which everyone read now. This book was inspired a number of people in the world. When you read this guide you will enter the new dimensions that you ever know just before. The author explained their strategy in the simple way, consequently all of people can easily to be aware of the core of this book. This book will give you a lot of information about this world now. To help you see the represented of the world in this book.

Deborah Fishman:

Reading can called head hangout, why? Because when you find yourself reading a book specifically book entitled Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering) your thoughts will drift away trough every dimension, wandering in most aspect that maybe mysterious for but surely can become your mind friends. Imaging every single word written in a e-book then become one application form conclusion and explanation that maybe you never get previous to. The Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering) giving you an additional experience more than blown away the mind but also giving you useful facts for your better life on this era. So now let us teach you the relaxing pattern is your body and mind will be pleased when you are finished reading it, like winning an activity. Do you want to try this extraordinary spending spare time activity?

Margaret Babin:

Many people spending their period by playing outside using friends, fun activity together with family or just watching TV all day every day. You can have new activity to pay your whole day by looking at a book. Ugh, do you consider reading a book really can hard because you have to use the book everywhere? It okay you

can have the e-book, getting everywhere you want in your Mobile phone. Like Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering) which is getting the e-book version. So , why not try out this book? Let's find.
