## **Be Prepared for the AP Calculus Exam** Mark Howell, Martha Montgomery

Be Prepared for the AP Calculus Exam is your indispensable guide to scoring well on either the AB or BC AP Calculus. This book features an outstanding team of authors and practice exam contributors: veteran AP Calculus teachers who have served on the AP Calculus Test Development Committee and are College Board consultants, exam grading leaders, and AP award recipients. The book expands Skylight's Be Prepared series, and it is crafted with the same care, attention to detail, and respect for the student as our Be Prepared for the AP Computer Science Exam, which has helped many thousands of students get a good grade on AP exams in that subject.

A serious introductory chapter describes the exam format and requirements and offers important tips for successful exam taking. Eight review chapters thoroughly cover all of the AB and BC material. Embedded in these chapters are 200+ multiple choice and free response questions with solutions that show you effective strategies and shortcuts. Five complete practice exams with answers and solutions (three AB and two BC exams) will give you plenty of practice material and help you decide whether to take the AB or BC exam. This book's companion web site contains annotated solutions to free-response questions from past AP exams.

Whether you sit in the front row, the back row, or anywhere in between, Be Prepared will help you focus on the AP Calculus exam requirements, review the material, and fill the gaps in your knowledge. Review, practice, and take the AP Calculus exam with confidence, knowing that you are well prepared.
