Residents, fellows and practicing radiologists who are preparing for certification exams (the current ABR Part II oral, the future ABR Core and Certifying, CAQ and MOC) will find the new edition of this case-based review book an indispensable tool for success. **Duke Radiology Case Review** has long been considered one of the standards in board review, and is a well-known adjunct to the popular and well-attended board review course given by the prestigious Department of Radiology at Duke University. Close to 300 case presentations are structured to align with the way residents are taught to work through patient cases. Divided by body region and including chapters on interventional radiology and nuclear medicine, each case offers a clinical history, relevant images, and bulleted points describing the differential diagnosis. This is followed by the actual diagnosis and key clinical and radiologic facts about the diagnosis and suggested readings. This edition includes a new chapter on cardiac imaging.

From reader reviews:

David Hogan:

Book is to be different for every single grade. Book for children until adult are different content. As you may know that book is very important for people. The book Duke Radiology Case Review: Imaging, Differential Diagnosis, and Discussion seemed to be making you to know about other understanding and of course you can take more information. It is very advantages for you. The book Duke Radiology Case Review: Imaging, Differential Diagnosis, and Discussion is not only giving you much more new information but also being your friend when you experience bored. You can spend your spend time to read your publication. Try to make relationship together with the book Duke Radiology Case Review: Imaging, Differential Diagnosis, and Discussion. You never experience lose out for everything when you read some books.

Sharron Marty:

Your reading sixth sense will not betray anyone, why because this Duke Radiology Case Review: Imaging, Differential Diagnosis, and Discussion e-book written by well-known writer whose to say well how to make book that could be understand by anyone who have read the book. Written inside good manner for you, dripping every ideas and creating skill only for eliminate your hunger then you still hesitation Duke Radiology Case Review: Imaging, Differential Diagnosis, and Discussion as good book not simply by the cover but also with the content. This is one book that can break don't evaluate book by its include, so do you still needing a different sixth sense to pick this!? Oh come on your examining sixth sense already alerted you so why you have to listening to one more sixth sense.

Stephen Ross:

As a scholar exactly feel bored for you to reading. If their teacher asked them to go to the library in order to make summary for some guide, they are complained. Just minor students that has reading's heart or real their hobby. They just do what the teacher want, like asked to the library. They go to presently there but nothing reading significantly. Any students feel that examining is not important, boring along with can't see colorful photographs on there. Yeah, it is being complicated. Book is very important for you. As we know that on this time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore this Duke Radiology Case Review: Imaging, Differential Diagnosis, and Discussion can make you really feel more interested to read.

Joyce Cannon:

A number of people said that they feel weary when they reading a e-book. They are directly felt this when they get a half portions of the book. You can choose typically the book Duke Radiology Case Review: Imaging, Differential Diagnosis, and Discussion to make your own reading is interesting. Your personal skill of reading talent is developing when you like reading. Try to choose simple book to make you enjoy you just read it and mingle the idea about book and looking at especially. It is to be first opinion for you to like to

open a book and read it. Beside that the e-book Duke Radiology Case Review: Imaging, Differential Diagnosis, and Discussion can to be your brand-new friend when you're experience alone and confuse with what must you're doing of that time.
