By taking an holistic and contemporary approach to the problem of developing sustainable tourism operations, this book provides a comprehensive assessment of the strategies that need to be considered by various governments, developers and, in particular, the customer-investor.

The major features of resort development covered by this book include:

- Environmental scanning of principal external and internal influential factors
- The curse and blessings of seasonality
- Competition for people's recreation and retirement dollars
- Guest activity programming
- Environmental issues
- Cruise ships as mobile resorts
- Staffing issues in isolated areas
- Financial challenges for owners and operators alike
- Risk Management
- Mutually beneficial options for various stakeholders

Based on an analysis of global resort opportunities and trends, the book focuses on those generic features that differentiate regional resort management from urban-centric management needs and priorities.
