**Martian Outpost: The Challenges of Establishing a Human Settlement on Mars (Springer Praxis Books)** Erik Seedhouse

Mars Outpost provides a detailed insight into the various technologies, mission architectures, medical requirements, and training needed to send humans to Mars. It focuses on mission objectives and benefits, and the risks and complexities that are compounded when linked to an overall planet exploration program involving several expeditions and setting up a permanent presence on the surface.

The first section provides the background to sending a human mission to Mars. Analogies are made with early polar exploration and the expeditions of Shackleton, Amundsen, and Mawson. The interplanetary plans of the European Space Agency, NASA, and Russia are examined, including the possibility of one or more nations joining forces to send humans to Mars. Current mission architectures, such as NASA's Constellation, ESA's Aurora, and Ross Tierney's DIRECT, are described and evaluated.

The next section looks at how humans will get to the Red Planet, beginning with the preparation of the crew. The author examines the various analogues to understand the problems Mars-bound astronauts will face. Additional chapters describe the transportation hardware necessary to launch 4-6 astronauts on an interplanetary trajectory to Mars, including the cutting edge engineering and design of life support systems required to protect crews for more than a year from the lethal radiation encountered in deep space. NASA's current plan is to use standard chemical propulsion technology, but eventually Mars crews will take advantage of advanced propulsion concepts, such as the Variable Specific Impulse Magnetoplasma Rocket, ion drives and nuclear propulsion.

The interplanetary options for reaching Mars, as well as the major propulsive maneuvers required and the trajectories and energy requirements for manned and unmanned payloads, are reviewed. Another chapter addresses the daunting medical problems and available countermeasures for humans embarking on a mission to Mars: the insidious effects of radiation on the human body and the deleterious consequences of bone and muscle deconditioning. Crew selection will be considered, bearing in mind the strong possibility that they may not be able to return to Earth. Still another chapter describes the guidance, navigation, and control system architecture, as well as the lander design requirements and crew tasks and responsibilities required to touch down on the Red Planet.

Section 3 looks at the surface mission architectures. Seedhouse describes such problems as radiation, extreme temperatures, and construction challenges that will be encountered by colonists. He examines proposed concepts for transporting cargo and astronauts long distances across the Martian surface using magnetic levitation systems, permanent rail systems, and flying vehicles. In the penultimate chapter of the book, the author explains an adaptable and mobile exploration architecture that will enable long-term human exploration of Mars, perhaps making it the next space-based tourist location.

### **From reader reviews:**

#### **Kristen Self:**

Within other case, little people like to read book Martian Outpost: The Challenges of Establishing a Human Settlement on Mars (Springer Praxis Books). You can choose the best book if you want reading a book. Given that we know about how is important the book Martian Outpost: The Challenges of Establishing a Human Settlement on Mars (Springer Praxis Books). You can add understanding and of course you can around the world by the book. Absolutely right, simply because from book you can learn everything! From your country till foreign or abroad you will find yourself known. About simple issue until wonderful thing you may know that. In this era, we can easily open a book as well as searching by internet product. It is called e-book. You can utilize it when you feel fed up to go to the library. Let's examine.

#### **Gwen Anderson:**

Information is provisions for anyone to get better life, information these days can get by anyone on everywhere. The information can be a information or any news even an issue. What people must be consider any time those information which is from the former life are challenging be find than now is taking seriously which one works to believe or which one often the resource are convinced. If you have the unstable resource then you buy it as your main information there will be huge disadvantage for you. All of those possibilities will not happen inside you if you take Martian Outpost: The Challenges of Establishing a Human Settlement on Mars (Springer Praxis Books) as the daily resource information.

#### **Candace Arroyo:**

Reading a book tends to be new life style with this era globalization. With examining you can get a lot of information that could give you benefit in your life. Having book everyone in this world could share their idea. Publications can also inspire a lot of people. A lot of author can inspire their own reader with their story as well as their experience. Not only the storyplot that share in the guides. But also they write about the knowledge about something that you need instance. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that you can get now. The authors on earth always try to improve their skill in writing, they also doing some investigation before they write on their book. One of them is this Martian Outpost: The Challenges of Establishing a Human Settlement on Mars (Springer Praxis Books).

#### **Jeffrey Call:**

Do you like reading a guide? Confuse to looking for your best book? Or your book has been rare? Why so many problem for the book? But virtually any people feel that they enjoy to get reading. Some people likes reading through, not only science book but novel and Martian Outpost: The Challenges of Establishing a Human Settlement on Mars (Springer Praxis Books) or even others sources were given know-how for you. After you know how the good a book, you feel need to read more and more. Science book was created for teacher or perhaps students especially. Those publications are helping them to include their knowledge. In

some other case, beside science reserve, any other book likes Martian Outpost: The Challenges of Establishing a Human Settlement on Mars (Springer Praxis Books) to make your spare time a lot more colorful. Many types of book like here.
